

The Global Supply Chain Management (GSCM) option allows students to learn how the network of suppliers, manufacturing facilities, distribution centers and customers located around the world work together to ensure that the right product arrives at the right place at the right time for the right price. The Center granted 57 Certificates in 2011 and 57 in 2012.

To meet option requirement, students must have a minimum of 2 classes from each group A&B, with a 3rd course (totaling 5) from group A, B or (A or B). Students should also submit a formal application for the Certificate at the end of their first year to be considered. Contact gscmi@purdue.edu for details.

Course Number	Course Title	Group
