

➤ **ITaP recommends compatible wireless accessories for TIC sites**

ITaP has issued a recommendation to faculty and teaching staff to purchase the make of wireless mouse and keyboard that is most compatible with Technology In the Classroom (TIC) site equipment. ITaP supplies the receiver and cradle for each TIC site, while departments or faculty members purchase the wireless mouse and charging cradle. Each TIC site will continue to have a wired optical mouse available.

ITaP is recommending wireless mice and keyboards from Gyration, Inc. These products have been tested and work well in computer equipped classrooms. While these products are available at several retail locations, Purdue has negotiated discounted pricing with the following vendor:

Vendor: Cumming & Associates
 Phone: (858) 503-1227
 Fax: (858) 503-1235

Departmental purchases can be made by contacting your business office. Business office staff can access the Ariba purchasing system, search on the supplier "Cumming" and use the product numbers and descriptions listed below to create an order. Individuals may call the vendor directly - be sure to mention Purdue to receive Purdue's discounted pricing.

Product numbers and descriptions to use when ordering:
