

# Setting up Purdue Newsgroups in Outlook Express

(You must have a Purdue IP address for this to work on your computer.)

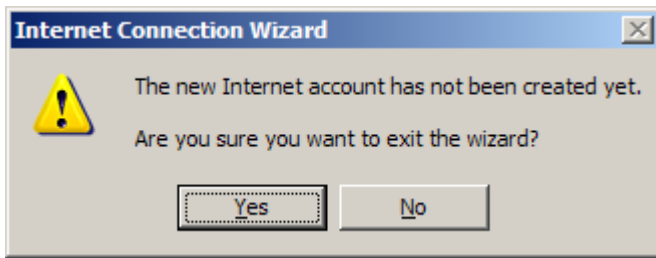

Open Outlook Express

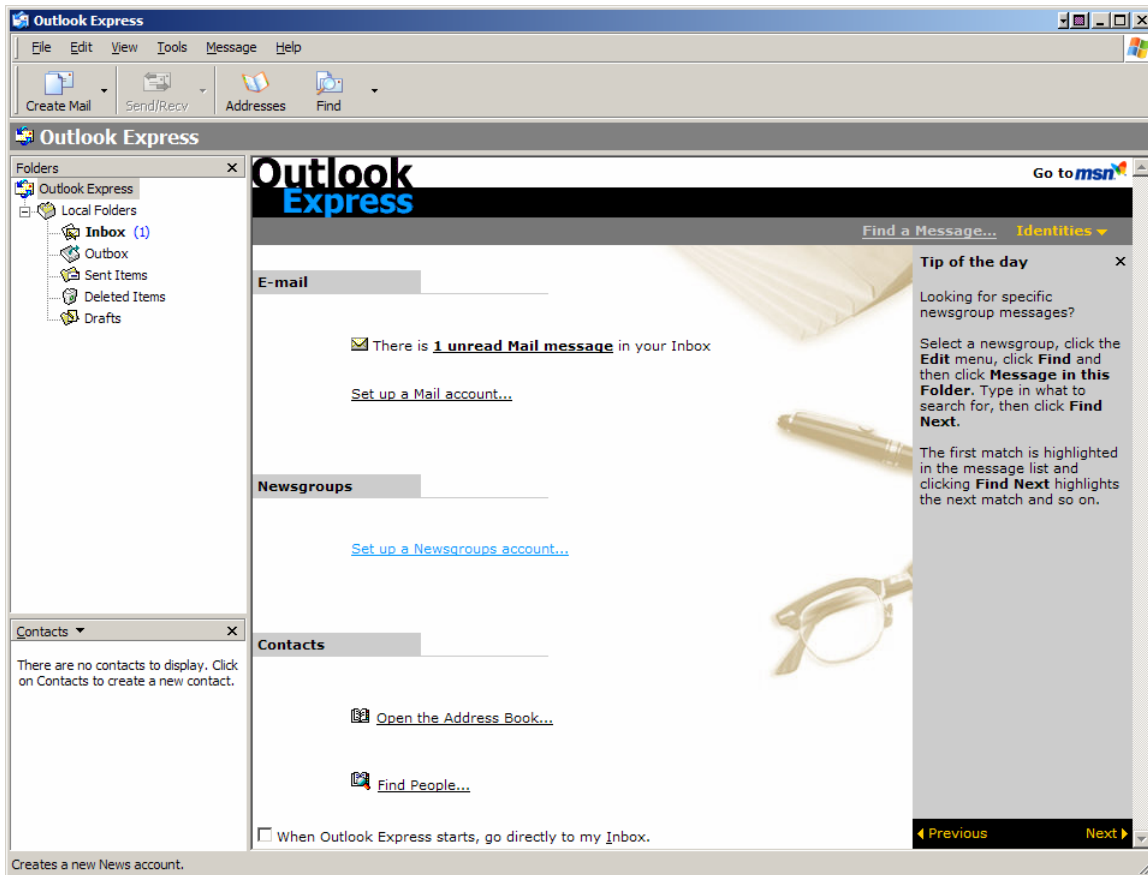

If this is your first time using Outlook Express you will most likely see a message like this one asking if you would like to make it your default mail client. Click **No**.

When you see the Internet Connection Wizard start up, hit **Cancel**. We will not be configuring an email account at this time.

Next click **Yes** to confirm that you want to exit the Internet account wizard.

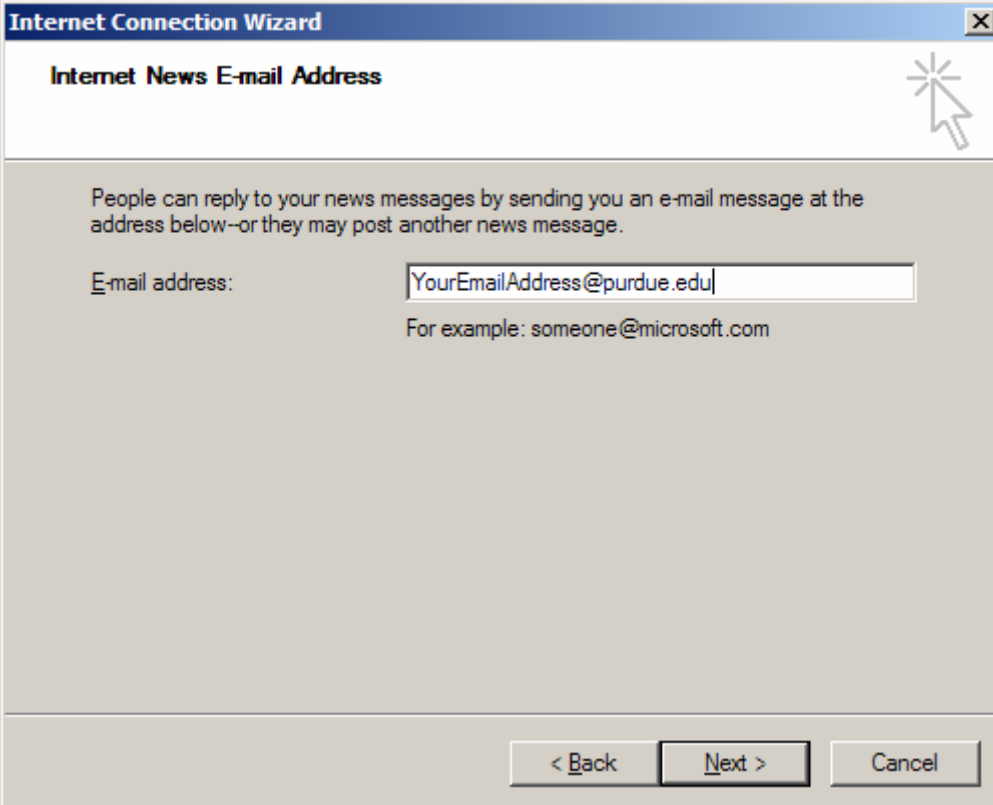

Find the Newsgroups section in the middle of the page and click on the link to “**Set up a Newsgroup account...**”

Type the name you want to appear in the **Display name** field and then click **Next**.
