PURDUE UNIVERSITY 

Syllabus

ECONOMICS 352: MACROECONOMICS
Professor: Drew Saunders
Semester: Spring 2009
Prerequisites: Econ 100, 101, 102
Credits: 3
Instructor: Drew Saunders
E-mail: saunders@krannert.purdue.edu

Course Description: This course is an introduction to macroeconomics. It covers the theory and practice of macroeconomics, including the study of aggregate supply and demand, the business cycle, and the role of government in the economy. The course is designed to provide students with a solid understanding of the principles of macroeconomics and the ability to apply these principles to real-world economic problems.

Course Objectives: Upon completion of this course, students should be able to: understand the basic principles of macroeconomics; analyze the relationship between aggregate supply and demand; explain the business cycle; and evaluate the role of government in the economy.

Prerequisites: Econ 100, 101, 102

Reference: Principles of Macroeconomics, 4th Edition, John P. Taylor (2006)

PURDUE UNIVERSITY 

Questions?

An Assignment:
