KRANNERT SCHOOL OF MANAGEMENT

COMBINED DEGREE PROGRAM

MANAGEMENT/MASTER OF SCIENCE IN HUMAN RESOURCE MANAGEMENT

PROGRAM PROCESS

The Management/Master of Science in Human Resource Management (MSHRM) Combined Degree Program will provide high-achieving students in the Krannert School of Management an opportunity to accelerate their education and allow them to enter the Human Resource Management profession with solid preparation for their career success. Students will build on a strong foundation of coursework and opportunities in Management by adding Master’s classes in organizational behavior and human resource management, and management courses in marketing, accounting, finance, strategic management and operations management.

Requirements to apply to the Management/MSHRM Combined Degree Program

The stand-alone Management degree requires a minimum of 124 credit hours for students on a pre-Fall 2014 plan of study and 120 credit hours for those beginning Fall 2014 and after. The stand-alone Master of Science degree requires a minimum of 48 credit hours, which must be completed within three semesters.

- Completion of 108/112 credit hours of coursework by the end of their junior year, including completion of MAI Core, Foundations courses, University Core requirements and international electives, upper division courses except for specific substitutions, concentration courses for Management and Industrial Management students.
- Minimum of 3.7 GPA (3.5 GPA with strong leadership and internship experience will be considered)
- Completion of at least one professional internship
- Have met with academic advisor and Debbi Bearden in the Krannert undergraduate advising office
- Demonstration of leadership potential through extra-curricular activities

The MBA and Master’s Programs office will hold callouts for students in their freshman, sophomore, and junior years to help them prepare for expectations into the Master’s program and to explain the admissions process. After meeting with Debbi Bearden, students should also set up a meeting with the Krannert Master’s Programs Office so their readiness to enter master-level coursework can be ascertained. The meetings are designed to guide students and help them with decision-making about the program. Students will complete the Graduate School application during their junior year and will receive notification of their admission decision with time to make plans for the coming year.

During the first year of the Master’s program, no more than 12 graduate-level credits may be used to meet the final Bachelor’s degree requirements.
