Master of Science in Global Supply Chain Management—MS(GSCM)

The Global Supply Chain Management program builds on Krannert’s core strength in operations, supply chain management, and business analytics to provide skills that will well position you for a career in managing global supply chains. In addition to courses that will develop your contextual knowledge and problem solving skills, the program provides unique global project experience. The program includes students from Krannert’s global university partners, enabling a sharing of internship and work experiences.

Program Highlights:

- A wide selection of courses developed by Krannert faculty who teach in our elite Operations programs.

- International partnership across a global supply chain with Tianjin University (China), Indian Institute of Management Udaipur (India), and Shanghai Jiao Tong University (China) brings unique global perspective and experience to the students.

- Faculty directed summer experiential learning projects give students unique learning experience by working in international teams to apply classroom knowledge to the real world under close faculty guidance.

New Product Development

Purdue is a great fit for me. It is right in the middle of the city and I enjoy being close to all the restaurants and other downtown bars. The school has a great atmosphere and has many options to explore. I would recommend this school to anyone who is interested in a career in the supply chain and logistics field.

Dennis Hernandez, '17 MBA candidate
