Master of Science in Finance—MS(F)

The MS Finance program draws on real-world applications and access to the top minds in finance, complementing studies in the classroom to create a holistic learning experience. These intensive studies will further develop your abilities in critical thinking, analysis and problem solving. Small Class sizes offer students unparalleled access to faculty before they even arrive on campus.

Program Highlights:

• Working in a team-based environment, students study alongside peers from across the United States and around the world including MBA counterparts offering insights into broader business principles. Students gain a global business perspective in their classroom and group interactions.

• Flexible curriculum can be tailored to foster your individual aspirations. Prepares students for careers in corporate finance; investment management; security analysis and brokerage; commercial and retail banking; and financial management of commercial and nonprofit organizations.

• Graduates are well-suited to pursue opportunities in commercial banking, investment banking, asset management, financial risk management and analytics, and other financial services companies within the U.S. and around the world.

• No prerequisite finance course work is required as all foundation courses are taught with the expectation that students do not have a prior finance background.

• Students have the opportunity to take part in the Student Managed Investment Fund (SMIF), a unique program that provides real-world portfolio management and security analysis experience.
