Business Solutions

ALUMNI SPOTLIGHT

“The Executive MBA program will absolutely change your life. It will make you realize that you have the ability to perform at an executive level and you have the ability also to be an entrepreneur. The choice is yours but you’ll have the tools once you graduate to do either.” Watch the full testimonial video to learn more about Allan’s experience.

ALLAN MCNEAR
EMBA ‘20
Manufacturing Engineering
Senior Manager
Fiat Chrysler
Automobiles

Information compiled from recent cohorts.
As an engineer, my workload is extremely busy with tight deadlines. The additional workload of simultaneously going to school full-time, has even more so illuminated the importance of planning, managing, and prioritizing my schedule to successfully accomplish and support all tasks and programs. With such a busy schedule and high pressure, a strong support system becomes essential. The EMBA cohort team building approach helps to create a stimulating learning environment where work can more efficiently and effectively be accomplished as each of us navigate our way through the program. The relationships I have made within the cohort, has quickly become my built-in support system.

NATALIE TAYLOR MARTHALER
Systems Flight Test Engineer
