BS in Computer Science / Master of Business Administration (MBA)

The BSCS/MBA combined degree program offers the opportunity for select and outstanding Computer Science students to pursue an MBA while completing their BSCS degree. The MBA is seen as a complement to the student’s technical education, giving him or her understanding of the business context within which many technical decisions are made. The program will allow students to complete their B.S. and MBA degrees in five years.

Requirements

• Completion of at least 102 credit hours of coursework (that may include AP, advanced or transfer credit in math) by the end of junior year.

• Have a minimum 3.7 GPA (3.5 GPA with outstanding leadership and internship experience will be considered).

• Completion of at least one professional internship.

• Demonstration of leadership potential through extra-curricular activities.

• Have met with undergraduate academic advisor in the CS advising office.

Program Notes

• Students are required to schedule a meeting with the Purdue MBA and Master’s Program Admissions Office to determine the student’s readiness to enter master-level coursework and review credit hour requirements. After interviews, students will be counseled by staff with recommendations about the potential viability of their application.

• Students who are encouraged to apply will complete the Graduate School application in early spring of their junior year. Admissions decisions will be made in time for them to complete plans for the upcoming year.

• CS students entering the Combined Degree Program will be required to take 60 credit hours of Master’s level coursework satisfying MBA requirements; and also 120 credit hours to satisfy the BSCS requirement; with up to 18 credits that can be counted towards both degrees.

• A minimum of 162 total credit hours, including all required courses for the undergraduate major and all core requirements for the MBA, and a 3.0 GPA are required to receive their MBA degree.

“...It’s a great opportunity for you to finish your undergraduate and master’s degree in a quick but efficient way. One of the reasons I chose the program was because it allowed me to combine my degree but also learn from my peers both at the undergraduate level as well as the graduate level.”

Christine Rasquinha, ’18 Combined Degree Program
