

# COMBINED DEGREE PROGRAM

## BS in Chemical Engineering / Master of Business Administration (MBA)

The program will allow students to complete their B.S. and MBA degrees in five years. The MBA is seen as a complement to the engineer's technical education and many employers have a strong preference for hiring graduates with this background. Purdue's College of Engineering and Krannert School of Management have many longstanding relationships with leading employers in these fields, giving our graduates a competitive edge.

### Requirements

- Completion of 113 credit hours of coursework (that may include AP, advanced or transfer credit in math) by the end of junior year
- Have a minimum 3.5 GPA
- Demonstration of leadership potential through extra-curricular activities and/or internship experience
- Have met with undergraduate academic advisor in the ChemE advising office

### Program Notes:

- Students are required to schedule a meeting with the Purdue MBA and Master's Program Admissions Office to determine the student's readiness to enter master-level coursework and go over credit hour requirements. After interviews, students will be counseled by staff with recommendations about the potential viability of their application.
- Students who are encouraged to apply will complete the Graduate School application in early spring of their junior year. Admissions decisions will be made in time for them to complete plans for the upcoming year.
- ChemE students entering the Combined Degree Program will be required to take 60 credit hours of Master's level courses once they enter the program. Any Master's level courses completed prior to enrollment cannot be used to meet course requirements of the combined degree.
- A minimum of 3.0 GPA is required to receive their MBA degree.

"It's a great opportunity for you to finish your undergraduate and master's degree in a quick but efficient way. One of the reasons I chose the program was because it allowed me to combine my degree but also learn from my peers both at the undergraduate level as well as the graduate level."

**Christine Rasquinha, '18 Combined Degree Program Graduate**
