

Master of Science in Global Supply Chain Management—MS(GSCM)

The Global Supply Chain Management program builds on Krannert’s core strengths in operations, supply chain management, and business analytics to provide students with skills that will well position them for a career in managing global supply chains. In addition to courses that will develop contextual knowledge and problem solving skills, the program provides unique global project experience. The program includes students from Krannert’s global university partners, enabling a sharing of internship and work experiences.

"My experience at Krannert has been incredible. Every professor I have had class with has dedicated a lot of time and effort to ensure students are learning and advancing their business knowledge. And they are also involved in student organizations and events as well. The staff is extremely supportive as well. Anytime I needed help or had any concerns about internships and jobs, the staff was always available to answer my questions and ensure I was developing as a business professional.

Milind Patel, '17 MS Global Supply Chain Management
